☑ Implemented on time (1.1 days)  
☑ Accurately implemented |

2018 Review Committee Assessment
IANA Service Level Agreement (SLA) Performance

- Less than 2 business day responses  SLA met 100%
- Right sized blocks allocated  SLA met 100%
- Numbers given don’t overlap  SLA met 100%
- Numbers given match delegation  SLA met 100%

The Regional Internet Registry (RIR) staff have reviewed the IANA performance reports for 2018 and confirm that the Service Level Agreements (SLA) were met 100% of the time in all cases. It is noted that the IPv4 unicast requests in March and September were automatic allocations made to the RIRs in accordance with the Global Policy for Post Exhaustion IPv4 Allocation Mechanisms by the IANA. These allocations were executed as expected with no issues to note. The three AS number requests submitted during the months of August and December fully met the expectations of the RIRs and were executed within the agreed to terms of our SLA with no issues to note. The RIRs recognize the flawless execution of IANA services in 2018.
