Re: Service Level Agreement for the IANA Numbering Services

Dear Regional Internet Registries:

As of 1 October 2016, ICANN's IANA functions contract with the United States government has expired, and ICANN has accepted responsibility to continue providing the IANA services.

Accordingly the condition precedent contained in the Service Level Agreement for the IANA Numbering Services has been satisfied and that agreement is in effect.

We look forward to continuing to work together with you in service of the global Internet community.

Best,

Göran Marby
President & CEO ICANN
